

Agile In Practice

1 DAY | 8 HRS | IN PERSON

Goal

Learn the fundamentals of how to operate within Agile environments, practice defining and communicating product requirements, and learn how to improve efficiency of delivery.

Objectives

- Explain the benefits and tradeoffs of common product development frameworks: agile, lean, and waterfall.
- Develop a shared understanding of principles important to a lean and agile culture
- Clarify the differences between Scrum, and Kanban.
- Identify assumptions involved with product development and the impact those assumptions might have.

1-DAY AGENDA

WARM-UP

Building Digital Products

Level-set on the philosophies and frameworks that enable successful digital product discovery and delivery.

BREAK

Little 'a' agile

Discuss the values and principles that underlie successful product development and evaluate your role in an agile team.

LUNCH

Big 'A' Agile

Level-set on the roles, ceremonies and artifacts of teams that use Agile methodologies for product development.

BREAK

Minimum Viable Products

Learn how to satisfy early customers and provide feedback for future product development with minimum viable products (MVPs).
