

AI for Leaders

INSTRUCTOR-LED | 1 DAY | ONSITE OR REMOTE

Program Focus: How can leaders enable AI implementation? Create a plan for your business.

LEARNING OBJECTIVES

By the end of this session, participants will be able to:

- List AI-enabled processes and how they can be applied to solve business problems.
- Determine how to operationalize AI within an organization.
- Tactically plan how to operationalize AI at different levels of an organization.
- Form an AI strategy for your business.
- Generate a plan for scaling AI within your organization.

SAMPLE AGENDA: 6.5 HOURS (INSTRUCTOR-LED, 1 DAY)

Welcome and Warm-up

Frame the WHY behind AI, and determine WHY artificial intelligence matters to your organization now.

AI Process Overview

Articulate the process by which AI is created, applied, trained and managed.

Operationalizing AI

Identify the key conditions where AI can be implemented successfully (and unsuccessfully).

Developing an AI Strategy

Define the ways you as a leader can shape and manage an AI strategy for your organization.

Scaling AI's Impact

Determine ways to get to success or to scale in applying AI. Define what success or scale would look like for your organization and formulate a plan for achieving that intended outcome.

Bring it Home

Synthesize learnings from the workshop and ideate on how to take the first step towards implementing AI.
